## Subject: IMPORTANT INFORMATION REGARDING DESIGN 311-D

**Jessica Chen** <jchen@collusia.com>

November 7

To me (see more ▼)

HEY ADDISON!

Am I the only one who sees the problem with the firesuit's joints? Is this just me??

**Addison Grey** <agrey@collusia.com>

November 7

To Jessica Chen (see more ▼)

Jessica -

What do you mean? This better be important. You know we're under a tight deadline here...

**Jessica Chen** <jchen@collusia.com>

November 7

To me (see more ▼)

Yes, believe me, it's important. I know we probably don't have time to test this version, but... I was playing around with the suit in the lab today, and whatever we're using for the joints is super stiff. When I put it on, I could barely bend my knees. Or my arms. I couldn't bend anything, period!!

**Addison Grey** <agrey@collusia.com>

To Jessica Chen (see more ▼)

...You were in the lab? And you tried the suit on? I appreciate the dedication, but that's breaking the rules. I don't want to have to report you.

**Jessica Chen** <jchen@collusia.com>

To me (see more ▼)

The point is, you have to change the material used for the joints. Otherwise someone is going to get hurt. And Lisa S. will kill us.

**Addison Grey** <agrey@collusia.com>

November 7

To Jessica Chen (see more ▼)

Alright, point taken. I mean, Lisa always says some failures are good - we could learn from them. But not a failure this big... We have to start over and make ANOTHER fireproof suit before the deadline. This version is supposed to be used by an agent in a WEEK. We'll need to work fast.

**Jessica Chen** <jchen@collusia.com>

November 7

To me (see more ▼)

We need something flexible for the joints, not stiff at all. I'm in the lab right now, looking at all the materials we have here. We still have a bunch of graphene - that's pretty dang flexible. Would it work?

**Addison Grey** <agrey@collusia.com>

November 7

To Jessica Chen (see more ▼)

Graphene? Not a bad choice. You know what, let's use that on the joints. You can start now, I'll be there early tomorrow to help you out.

**Jessica Chen** <jchen@collusia.com>

November 7

To me (see more ▼)

You want me to start now? Shouldn't we test it first? Just in case?

**Addison Grey** <agrey@collusia.com>

November 7

To Jessica Chen (see more ▼)

No, no, no. No time. I know we usually do prototypes, but we have LESS THAN A WEEK for this. Just go for it.

**Jessica Chen** <jchen@collusia.com>

Whatever you say, boss...
