Transcript

You're back! That's great news, because I have a lot more classified data on Collusia's supersuit project. This version of the suit was supposed to be really strong and tough, so I called it the ArmorSuit. Collusia's special agents—the shivelers—wore the ArmorSuit when they were hunting the kids that Lisa was testing in the TimeTilter. Here's the amazing part: We convinced two of the shivelers to break away from Collusia and join ThirdEye. They agreed to talk to us about the terrible things that happened to them in the TimeTilter. We recorded that interview, and you'll find it on this page along any other information we found about the ArmorSuit. Your mission is to find out what went wrong and why it failed. Remember, what you discover will help us create our own invincible supersuit.
